

**1.**

A Web application that allows the user to enter the amount and add the Expenses ,And it gives a Graphical representation on the Expenditure.

## Idea Brainstorming

**2.**

Expense tracker connect to your bank account and/or credit cards to track and categorize your expenses, giving you a good idea of your purchasing behavior. This can help identify spending areas where you could make cuts. Should I use an expense tracker app? Keeping track of your expenses is an important part of managing your overall finances.

**3**

.The App tracks and categorizes all the expenses you make on your credit or debit card. The app creates charts indicating your monthly cash flow and breaking down your monthly expenses. It has two versions: the free financial dashboard and the wealth management service. The wealth management option provides an investment management option, which functions as a robo-advisor while providing live support. The free financial dashboard provides budgeting and a cash flow analyzer. The app can also help you with retirement planning and provide an investment checkup.
