Title :Expense Tracker

Author : Prof Miriam Thomas , Lekshmi P , and Dr. Mahalekshmi T

Year: 2019

Abstract:

The web application “Expense Tracker” is developed to manage the daily expenses in a more efficient and manageable way. By using this application we can reduce the manual calculations of the daily expenses and keep track of the expenditure. In this application, the user can provide his income to calculate his total expenses per day and these results will be stored for each user. The application has the provision to predict the income and expense for the manager using data mining. In this application, there are 3 logins such as admin, manager and staff. Admin has the privilege to add, edit, delete manager, add, edit, delete staff, and to get all custom reports. For managers, the privileges are to add types of expenses, verify expenses, add types of income, verify income and generate reports. For staff, the privileges are to add and edit expenses, income and calculations, and send for verifications.

Title :Expense Manager Application

Author: Velmurugan A, Albert Mayan J , Niranjana P and Richard Francis

Year:2021

Abstract:

Mobile applications are top in user convenience and have overpassed the web applications in terms of popularity and usability. There are various mobile applications that provide solutions to manage personal and group expenses but not many of them provide a comprehensive view of both cases. In this paper, we develop a mobile application developed for the android platform that keeps record of user personal expenses, his/her contribution in group expenditures, top investment options, view of the current stock market, read authenticated financial news and grab the best ongoing offers in the market in popular categories. The proposed application would eliminate messy sticky notes, spreadsheets confusion and data handling inconsistency problems while offering the best overview of your expenses. With our application we can manage their expenses and decide on their budget more effectively.

Title:Intelligent Online Budget Tracker

Author:Girish Bekaroo and Sameer Sunhaloo

Year:2007

Abstract:

We present an intelligent online budget tracker (GeniusIOBT.com) to efficiently manage household budgets. Our system will help to plan and track household-budget related issues where members of the system can securely access it anytime from anywhere via the Internet. The Intelligent Online Budget Tracker not only keeps track of the budget but also provides means to analyze data via charts and graphs as well as intelligently predicting future budgets and issues like bankruptcy.

Title :Application for Tracking Personal Expense

Author : M. Harish Kumar, G.P. Shree Harini, D. Thenmullai

Year: 2012

Abstract:

Expense tracker is an android based application. This application allows the user to maintain an online diary. Expense tracker application will keep a track of Expenses of a user on a day-to-day basis. It keeps a record of your expenses and also will give you a category wise distribution of your expenses. With the help of this application users can track their daily/weekly/monthly expenses. This application will also have a feature which will help you stay on budget by sending alerts. This app will generate a report at the end of month to show Expense via a graphical representation. We also have added a special feature which will distribute expenses in different categories suitable for the user. An expense history will also be provided in application.

Title:Personalized Expense Managing Assistant Using Android

Author:N.ZahiraJahan,K.I.Vinodhini

Year:2016

Abstract:

Mobile applications stood top among usability and user convenience. Many applications are available in the market to manage personal and group expenses. Not many applications provide a comprehensive view of both use cases. In this project, we develop a mobile application that keeps track of user personal expenses, his/her personal contribution towards group expenses; maintain monthly incomes, recurring and ad hoc payments. It provides information of "who owes who and by how much". The proposed application would eliminate sticky note, spreadsheet and ledger that cause confusions, data inconsistency problems while recording and splitting of expenses. With our application, the user can manage his expenses more effectively. This application will not only helps users to manage their expenses but also help marketing executives to plan marketing according to the needs of users

Title:VOICE OPERATED REAL TIME EXPENSE TRACKER USING REACT JAVASCRIPT

Author:Shobhit Sharma and Parth Verma

Year:2021

Abstract:

In today's technological society, the major role played in people's life is played by earning. Each and every person requires money to live and adapt to the standard of living. The today's developing generation is growing day by day and in this process of the betterment of the people's living quality, the demands of making people's life efficient and quality of life higher money is the major demand. Therefore, in context to that particular scenario we as a web developer invested our technical and logical skills in making a user friendly and using the latest technology, we created a web application called ``The Real-time voice operated expense and

transaction tracking” web application. The Real-time voice operated expense and transaction tracking application is a web application that acts as a wallet to the people and tracks all the transactions and expenses that a person is doing in his/her daily life. This application is a voice command activated application that contributes in providing user interactive UI allowing the people to easily add and remove the money as per the required date. This is a totally automatic website that works on voice commands created using React JavaScript libraries. The major components covered in this voice based application is React JavaScript and MongoDB database used to store the user data and APIs for User authentication and for data transfer to backend databases. A user using the application can see a wide range of features in respective categories. This application gives each user a satisfaction for the login and safety of each and every particular user also its very user friendly and user oriented application.

Title :Expense Tracker Application

Author : Velmurugan.R , Mrs.P.Usha
